

## ON THE WEB

Decorating with antiques can be an imaginative way to design an original space in your home or garden. Provenance carries an eclectic array of antique European furniture, lighting and decor to help create such an environment. Owners Artur Tybuszewski and Yarek Filipczak hand-select and import an inventory of French, Spanish and Italian antiques, which is available on the firm's Web site, [provenanceonline.com](http://provenanceonline.com).

Find one-of-a-kind pieces from the 18th, 19th and 20th centuries, including Art Deco, Provençal and Venetian styles. Each piece is indexed with a photo, dimensions, style, price and origin. The online collection is organized by category for easy navigation. This virtual showroom allows shoppers to zoom in on individual pieces for more information and detailed views.

Some of the more extensive offerings come under such categories as Lighting, Accessories, and Benches and Stools. For example, in Accessories one might find a wooden statuette of St. Christopher, circa 1780, from France. In Lighting, a 1940s wrought-iron French chandelier is one of the many options presented. In Benches and Stools, an olive wood Spanish-style bench from the 1930s is shown alongside Modern chrome bar stools. —Lindsay Norman
